## Electrophysiology

### Message from the Guest Editors

Ion channels can select ions to pass through the cell membrane in a wide variety of cells. These different types of ion channels act to modulate the activities of Na<sup>+</sup>, Ca<sup>2+</sup>, and K<sup>+</sup> channels in controlling cell excitability. Moreover, cellular electrophysiological studies have indicated that different ion channels such as HCN channels or voltage-gated K<sup>+</sup> channels have been essential for various cell functions, such as seizure or pain sensation. Recent emerging progress in the pharmacological characterization of ion channels modulated by different compounds has shown the fundamental importance of ion channels in physiology, pharmacology, and various disorders.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
