

Special Issue

Advances in Endocrine Disruptors

Message from the Guest Editors

Dear colleagues, Endocrine disruption is now considered a major health concern affecting all people worldwide. For the last few years, a large number of clinical and experimental studies have deepened and progressed our knowledge of the molecular mechanisms involved in endocrine disruption. Nevertheless, some issues still need to be documented: non-monotonic effects (low-dose effects), non-classical steroid receptors, new signaling pathways, the adverse effects of mixtures, transgenerational effects, and new screening tools.

This Special Issue aims to review current advances in the field of endocrine disruption with the purpose of better understanding these unmet needs. Contributions to both animal models and/or humans, as well as to alternative tools, are encouraged, to shed light on the development of new hypotheses about endocrine disruption.

Guest Editors

Prof. Dr. Nicolas Chevalier

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
