Molecular Research of Endometrial Pathophysiology

Message from the Guest Editors

The endometrium has been the subject of intense research in a variety of clinical settings, because of its importance in the reproductive process and its roles in women's health. In the past 15 years, significant efforts have been invested in defining the molecular phenotype of the receptive phase endometrium. Although this has generated a wealth of information on the molecular landscape of human endometrium during the receptive phase, there is a need to complement this information in light of the novel methodologies and innovative technical approaches. The focus of this *International Journal of Molecular Sciences* Special Issue is on molecular and cellular mechanisms of endometrium and endometrium-related disorders. Research papers and review articles covering the progress made in molecular actions of steroids, metabolism of steroids and intracrinology, endometrial intracellular pathways, 'omics' of endometrium will be included. In addition, articles and reviews on molecular alterations underlying endometrium-related pathologies will be covered.

Guest Editors

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
