Environmental Determinants and Their Impact on Human Reproduction and Reproductive Immunology

Message from the Guest Editors

Over the years, there has been a significant rise in the industrialisation and use of synthetic chemical products, causing a daily exposure to hazardous compounds at home and the workplace, with some compounds acting as endocrine-disrupting chemicals (EDCs) known to adversely affect the endocrine system and leading to compromised hormonal functions resulting in developmental anomalies in the reproductive tract and sub/infertility. In assisted reproductive technology, every step in the early embryo development involves the use of a range of plastics and environmental fluctuations crucial for epigenetic reprogramming in the early embryo, defining the landscape for life. Therefore, there is a dire need to understand the molecular mechanisms through which environmental determinants cause reproductive dysfunction. This Special Issue calls for papers addressing the impact of environmental determinants on cellular/molecular mechanisms and the underlying pathways implicated in reproductive disorders and infertility.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
