Environmental Adaptation Mechanisms of Extremophytes

Message from the Guest Editors

Dear colleagues, The Earth is made up of various types of environments, some of which include extreme conditions such as high temperature, drought, freezing, high salinity, or high or low pH, which are unfavorable for most organisms to survive. However, some species have thrived in these extreme conditions through unique adaptation mechanisms. Extremophile plants ('extremophytes') are defined as plants that survive in extreme environments where other plants cannot live. These plants are represented by freezing tolerant Arctic or Antarctic plants or alpine plants, desiccation-tolerant desert plants, or salt-tolerant plants that grow in waters of high salinity, and these plants are typically exposed to complex abiotic stress factors. They have attracted the attention of researchers because of their unique physiological and ecological traits.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
