

Special Issue

Emerging Techniques for Fabrication and Characterisation of Novel Biomimetic Materials and Biological Objects

Message from the Guest Editor

This Special Issue of the International Journal of Molecular Sciences will serve as a collection of excellent research articles and review papers, where researchers working in a range of biomaterials-related areas will present their advances in the development and application of novel techniques for the fabrication and characterisation of biomedical materials. Every paper submitted for consideration should report a novel technique for the synthesis, development or characterisation of materials of materials-related biological objects. The unusual application of well-established techniques and reports on the use of artificial intelligence in combination with phys-chem techniques, or their applications for environmental monitoring, will also be considered. Multidisciplinary studies where fabrication and characterisation methods normally used for “less biological” objects are successfully applied for biomedical research are particularly welcome. The prospective authors are encouraged to explicitly indicate the originality of their novel techniques in cover letters and abstracts.

Guest Editor

Prof. Dr. Rawil Fakhrullin

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
