

## Special Issue

# Food Hydrocolloids: Molecular Vision

### Message from the Guest Editors

Hydrocolloids are excellent allies in food technology in a world concerned with quality and food safety, both as ingredients and additives used throughout the food production chain. This Special Issue seeks to collect original publications and reviews of critical literature related to the characterization, properties, functionality, and application of hydrocolloids in food and feed. The key focus of the research should be on the hydrocolloid material, from the perspective of both its chemical and physicochemical characterization and its applications in the food field, with special emphasis on results at a molecular level. Prof. Dr. Juan Mejuto  
Dr. Antonio Cid-Samamed

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
