Message from the Guest Editors

Dear colleagues, This Special Issue aims to collect high-quality review papers in all the fields of molecular genetics and genomics. We encourage researchers from related fields within the journal's scope to contribute review papers highlighting the latest developments in their research field, or to invite relevant experts and colleagues to do so. Topics include but are not limited to the following:

- Gene regulation, chromatin, and epigenetics
- Genome integrity, repair, and replication
- Genes or genomes related to phenotypes and human physiopathology
- Gene flow and transfer
- Plant genetic and genomic studies
- Computational genomics
- Functional genomics
- Cancer Genetics, Epigenetics and Oncogenomics
- Nutrigenomics
- Pharmacogenetics and Pharmacogenomics

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
