

## Special Issue

# Genetic and Metabolic Molecular Research of Lysosomal Storage Disease

### Message from the Guest Editor

Lysosomal storage diseases (LSD) is a group of inherited metabolic disorders in which defects of various lysosomal enzymes and regulatory proteins result in accumulation of different macromolecules in these organelles. There are over 50 LSD described in the literature, and they are among the most intensively studied genetic disorders. Review articles on all these aspects are also welcome. It is, therefore, expected that this special issue should provide a comprehensive view on molecular aspects of various LSD. Although pathophysiology, mechanism and therapeutic strategies of lysosomal storage diseases were topics covered by another special issue of IJMS, this issue is devoted to present research on molecular aspects of these diseases. The editors consider that this group of diseases is a forefront of genetic and metabolic disorders which are studied on molecular level, and our understanding of molecular mechanisms, molecular pharmacology and clinical aspects on molecular level are crucial for further research in this field, as well as for opening new ways of thinking about other, currently less understood, diseases.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
