

## Special Issue

# Genetic Markers in Sleep Disorders

### Message from the Guest Editor

Sleep is a fundamental physiological process with important restorative functions that are essential for optimal day-time functioning. Insufficient or poor-quality sleep has been associated with neurocognitive impairments, end-organ dysfunction, and chronic health conditions. The proposal of this Special Issue is to understand and to identify a genetic marker that may contribute to sleep disorders in both adults and children and is gained either from singular or multiple markers. The information obtained by such a non a priori approach offers an extraordinary opportunity to fully characterize biological processes in terms of pathophysiology and health outcomes.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
