Genetics of Eye Disease 2.0

Message from the Guest Editor

Genetics of eye diseases has been a field of interest for many researchers in the last few decades.

Technological advancement of molecular techniques allowed the spread of new approaches in search of genetic factors underlying pathological processes in ocular disorders. Recently, genome-wide association studies have emerged. These huge studies are more powerful in finding variations in genes of subtle effects to help defining heritability of polygenic eye diseases. Importance of knowledge regarding genetics of eye diseases is hard to overestimate, especially up against novel achievements of molecular manipulation techniques. Advances in sequence analysis and gene delivery methods, by viral and nonviral vectors have allowed the delivery of genetic payloads in preclinical models of retinal disorders, expanding the disease-modifying power of gene therapies. Despite the studies contributing to different eye diseases' genetics there is still little understood and much to be revealed. This special issue is focused on molecular side of the topic, nevertheless clinical implications are also welcome, if connected with biomolecular experiments.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
