

Special Issue

Genome Editing in Plants

Message from the Guest Editor

Genome editing is becoming a powerful tool for gene functional study and also for improving plants for growth and development as well as tolerance to various abiotic and biotic stress. In the past a couple of years, as new Cas are identified and new bioinformatics tools have been developed; this field has been developing quickly. Currently, it has been widely used in many plant species not only for gene functional study but also for crop improvement. In this Special Issue, both reviews and research papers, as well as method and bioinformatics papers, are welcomed.

Guest Editor

Prof. Dr. Baohong Zhang
Department of Biology, East Carolina University, Greenville, NC 27858,

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
