

## Special Issue

# Impact of Natural Products on Glycation Linked Metabolic Disease

### Message from the Guest Editor

In this Thematic Issue, we aim to provide evidence for the impact of glycative stress in promoting human tumorigenesis and the progression of diabetes. The proposed themes/sub-themes will be the potential application of antiglycating, antidiabetic and anticancer agents, and the use of RAGE and glyoxalase inhibitors in diabetes and cancer prevention. The themes for this issue including the following:

Dietary AGEs and their role in metabolic diseases, especially cancer and/or diabetes mellitus.  
The anticancer and antidiabetic effects of polyphenols: locking horns with AGEs.  
Do the antiglycation effects of curcumin promote the inhibition and apoptosis of cancer cells?  
The preventive effects of natural products on cancer and diabetes via glycation inhibition: can they act as a double-edged sword?

---

### Guest Editor

Dr. Saheem Ahmad

Department of Medical Laboratory Sciences, College of Applied Medical Sciences, University of Hail, Hail, Saudi Arabia

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
