

Special Issue

Granulomatous Inflammation

Message from the Guest Editors

This open-access special issue will bring together original research and review articles related to etiologies of granulomatous inflammation whether, infectious, genetic, environmental, autoimmune or dysbiotic in nature. This issue will additionally serve as a resource highlighting the latest in novel molecular diagnostics as well as innovative therapeutics particularly those that target macrophages, B cells and/or B and T cell interactions for the treatment of granulomatous inflammation.

Topics of this special issue include, but are not limited to:

- Infections leading to granulomatous inflammation especially those in which granulomatous inflammation is poorly described
- Infectious, genetic, autoimmune, environmental or dysbiotic etiology of sarcoidosis, Crohn's disease and/or CVID
- Innovative diagnostics for sarcoidosis, Crohn's and/or common variable immunodeficiency
- Therapeutics for the treatment of granulomatous inflammation
- Therapeutics for the treatment of sarcoidosis, Crohn's and common variable immunodeficiency specifically those modulating macrophage and lymphocyte responses

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
