

Joint Special Issue

The (Microbiota)–Gut–Brain Axis: Hype or Revolution?

Message from the Guest Editor

In this Special Issue on “The (Microbiota)–Gut–Brain Axis: Hype or Revolution?” we invite researchers to submit original research and review articles on the microbiota–gut–brain axis, including but not limited to the following topics:

- gut–brain signaling mechanisms underlying gastrointestinal symptom generation and perception in health and functional gastrointestinal disorders
- gut–brain signaling mechanisms underlying the control of appetite and feeding in health and disease
- influence of nutrient-related gut–brain signals on affective and cognitive processes in health and disease
- influence of gut microbiota composition and function on psychobiological processes in health and disease, and identification of the microbiota–gut–brain signaling mechanisms underlying these relationships

Guest Editor

Dr. Lukas Van Oudenhove

Laboratory for Brain–Gut Axis Studies (LaBGAS), Translational Research Center for Gastrointestinal Disorders (TARGID), University of Leuven, Leuven, Belgium

Deadline for manuscript submissions

closed (22 June 2018)
