

## Special Issue

# Hereditary Breast Cancer: Molecular Mechanisms and Susceptibility Pathways

### Message from the Guest Editor

Dear colleagues, Fanconi Anemia (FA) is an autosomal recessive or X-linked recessive genetic disease characterized by an enhanced risk of developing cancer. It has been known that four of the FA genes FANCD1/BRCA2, FANCN/PALB2, FANCF/BRIP1, and FANCG/RAD51C are also hereditary breast cancer genes.

Therefore, this Special Issue focuses on the interaction of both: the Fanconi Anemia pathway, and the molecular mechanisms of breast cancer development with a special focus on hereditary breast cancer.

High risk is conferred by the highly penetrant BRCA1 and BRCA2 genes as well as by other genes such as RAD51C or the Fanconi Anemia genes. Genes for breast cancer that were originally designated as moderately penetrant display higher penetrance than previously thought in families with a hereditary predisposition.

Submissions from all fields of gene mutation in hereditary breast cancer and especially in the FA related genes are invited.

---

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
