

## Special Issue

# Frontiers in Immuno-Oncology

### Message from the Guest Editors

Immunotherapy represents one of the mainstays of cancer treatment particularly after the introduction of immune checkpoint blockade. Manipulating the immune response against the tumor has gained success in patients with various tumors, generating lasting responses and increasing the chances of cure. An in depth knowledge of the immuno-biology, on patient selection (e.g. through biomarkers), on the management of immunotherapy associated side effects, on the evaluation of the response to these novel treatments is necessary for every clinician. Aim of this special issue is to provide an overview and an update on immuno oncology achievements with a multidisciplinary approach.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
