

## Special Issue

# Immune Modulation of Macrophages

### Message from the Guest Editors

A macrophage is a multifunctional cell type presenting consistent phenotype changes over its lifespan beginning from the embryonic period. The differentiation and maturation dependent to the microenvironment and in response to the internal and external stimuli often produce heterogeneity of the cells, by which the interpretation of the function becomes difficult. This Special Issue on “Immune Modulation of Macrophages” invites submissions of original reviews in this field of research, and focuses on the advanced technology concerning the understanding of the heterogeneity of cells in the disease process, especially in the phenotype changes and pathway analysis in response to the external treatment in disease treatments. If you have interest in contributing papers, please feel free to contact us or Vera Cao (vera.cao@mdpi.com). And we will provide a special discount.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
