Molecular Immunology in Hematological Disorders 2.0

Message from the Guest Editors

Dear colleagues, This Special Issue focuses on molecular immunology in hematology and specifically welcomes studies that elucidate molecular immunological mechanisms in the diagnosis and treatment of hematological disorders, in addition to other topics that are relevant to the Special Issue theme. Topics include, but are not limited to, the following: anemia; bioinformatics; COVID-19; functional genetics; genetically-engineered therapy; hematopoietic stem cell transplantation; leukemia; lymphoma; myeloma; thrombocytopenia

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
