Pro- and Anti-inflammation Signaling Pathways and Development of Anti-inflammatory Drugs

Message from the Guest Editor

This Special Issue aims to cover original and review articles on pro- and anti-inflammatory signaling pathways and the development of new synthetic or natural anti-inflammatory drugs. Therefore, we welcome research or review papers to expand our knowledge of pro- inflammatory and anti-inflammatory signaling pathways as well as to learn the latest information on novel synthetic or natural compounds with anti-inflammatory activity.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
