

Special Issue

Insects and Their Derived Products—an Innovative Source of Bioactives and Nutraceuticals

Message from the Guest Editor

Insects are important and dominant creatures in the nature because of their diversity, ecological role and influence on natural resources. Certainly the role of insects in human evolutionary history and wellness is indisputable. Insects and their derivatives serve a broad range of applications and these "raw products" have advanced at a dramatic pace into many fields, including pharmaceutical applications; tissue engineering; dentistry; plant science and agriculture; veterinary science; cosmetics and cosmeceutical; food and nutraceuticals, among others.

The Special Issue "Insects and Their Derived Products - An Innovative Source of Bioactives and Nutraceuticals" mainly focuses on cellular and molecular events induced by insects products and their derivatives, including basic studies in biochemistry, molecular biology, and molecular medicine.

Contributions for this Special Issue, both in form of review articles and original research, exploring aspects of the biological activity of insect products and their possible applications, not only composition, chemistry, analysis, but also the impact on the human health, are welcome.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
