Recent Advances and Future Perspectives of Male Reproduction: A Molecular Insight

Message from the Guest Editors

The most common issues with male reproductive health are male infertility and sexual dysfunction. Nearly 20–30% of infertility problems occur due to abnormalities or defects in the male reproductive organs. Assisted reproductive techniques are used worldwide in the management of male infertility to improve the reproductive outcomes, despite their low success rates, which can be due to certain molecular changes at the subcellular level. It is also critical to understand the molecular factors and associated mechanisms regulating the physiology and pathophysiology of male reproductive organs. This Special Issue on “Recent Advances and Future Perspectives of Male Reproduction: A Molecular Insight” will feature the articles related to male reproductive research advancements, with insights at the molecular level.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
