

Special Issue

Molecular Research on McArdle Disease

Message from the Guest Editor

The purpose of this Special Issue of *IJMS* is to explore this paradigm from a basic research point of view, to better understand the molecular mechanisms of the disease in order to improve the lives of McArdle disease patients. Therefore, this Special Issue provides an excellent opportunity to cover studies and reports on cell cultures, animal models, revealing new knowledge about the underlying pathophysiology/pathogenesis, or new aspects that could affect positively the progressive development of efficient molecules to fight this rare disease effectively. Keywords

- Glycogen
- Glycogen phosphorylase
- Small GTPases
- Cell signaling
- Skeletal muscle
- Immune system
- Brain
- McArdle disease

Guest Editor

Dr. Jose Luis Zugaza

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
