

## Special Issue

# Molecular Regulatory Mechanisms of Membrane Trafficking

### Message from the Guest Editor

The targeting and localization of newly synthesized and imported molecules to their own cellular destinations are a fundamental prerequisite for living organisms. Membrane trafficking is responsible for the broad spectrum of cellular functions, including vesicular transport, secretion, biogenesis, and maintenance of organelles, cell division, protein degradation, signal transduction, etc. Impairment of these functions could cause onset of many diseases; thus, understanding the molecular mechanisms and the regulatory mechanisms of membrane trafficking is important not only to gain knowledge concerning how living organisms could live, but also to find new pharmacological targets for a diverse range of diseases. In this Special Issue, we will focus on the physiological functions of the proteins which are involved in membrane trafficking, especially in the secretory and endosomal pathways. We will also discuss how these pathways could be interconnected and involve the onset of many diseases.

### Guest Editor

Prof. Dr. Satoshi Kametaka

Division of Biofunctional Sciences, Department of Integrated Health Sciences, Nagoya University Graduate School of Medicine, 1-1-20 Daiko-Minami, Higashi-ku, Nagoya, Aichi 461-0047, Japan

### Deadline for manuscript submissions

closed (31 March 2022)

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle  
Marche, Via Ranieri 65, 60100 Ancona, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
