MicroRNA-Based Cancer Therapy 2022

Message from the Guest Editor

The modulation of microRNAs (miRNAs) is a novel and promising therapeutic tool in the treatment of cancer, due to their broad influence on multiple cellular processes. This Special Issue attempts to collect the most recent progress made by multidisciplinary researchers in tackling the key challenges in microRNA-based cancer treatment. Keywords: microRNA; drug delivery; tumor microenvironment; immunotherapy; chemotherapy; drug resistance; cancer stem cells; epithelial–mesenchymal transition

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
