# Mitochondria Crosstalks with other Organelles in Pathophysiology

### Message from the Guest Editors

This Special Issue will center on reviews and primary data manuscripts that focus on defining (1) Mitochondria and physical and functional interactions with other organelles; (2) Role of mitochondria and organelle crosstalk in membrane lipid transport and dynamics; (3) Organelle crosstalks with mitochondria and cell signalling; (4) Organelles involved in the regulation of mitochondria biogenesis, degradation and homeostasis; (5) Control of calcium homeostasis by mitochondria and other organelles; (6) Organelle interactions in mitochondria mobility, shape and dynamics; and (7) Abnormalities in mitochondria interactions with other organelles and physiopathological consequences in metabolism and cancers.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
