

Special Issue

Multiple Myeloma Bone Disease: Symptoms, Diagnosis and Treatment 2.0

Message from the Guest Editor

This Special Issue is the continuation of our 2020 Special Issue “[Multiple Myeloma Bone Disease—Symptoms, Diagnosis and Treatment](#)”. In this Special Issue, we welcome contributions to all aspects of pathobiology, symptoms, diagnostic tools, and novel treatment options of MM bone disease. Preclinical fundamental and translational work is encouraged, including studies in precursor cells of the bone microenvironment, mouse studies, and novel bioreactor systems to imitate the cell–cell interactions between MM cells and their microenvironment.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
