

## Special Issue

# Biochemistry, Molecular Biology and Druggability of Proteins

### Message from the Guest Editors

The proteins are probably the most essential biomolecules for all life processes. In the last 20 years, huge progress with genomics, proteomics, and other OMICS has led to a deep understanding of most aspects of these important biomolecules. However, their study remains as fascinating as ever, because the exact functions of many proteins are not well understood, the regulatory processes and the interactions between proteins have been investigated in detail only recently, and the applications of this research have produced relevant results only in the last decade. These and other aspects related to molecular biology, regulation, structure, and function, as well as druggability of proteins, will be dealt with in this special issue of *IJMS*. Potential authors are invited to present their latest research in all these fields.

---

### Guest Editors

Prof. Dr. Claudiu T. Supuran  
Prof. Paola Gratteri  
Prof. Silvia Selleri

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
