

## Special Issue

# Recent Advances on Small Molecule for Multitarget-Based Treatment of Human Diseases

### Message from the Guest Editor

It has been observed that small molecules have continuously played an important role in the discovery of novel drugs to treat various kinds of human diseases. Presently, in drug design, prediction and elucidation of biomolecular targets is possible, although their interactions with other molecules and mechanisms of action are unknown. Topics such as bio- and chemoinformatics, small molecules, machine learning, peptide drugs, and modulators may help in improving the knowledge and development of new treatments.

This thematic issue aims to summarize recent advances in the medicinal chemistry of small molecules, mechanisms of action, and their application in clinical practice for treating various kinds of human diseases. The scope of this thematic issue will cover all areas of medicinal chemistry, including current developments in rational drug design, synthetic chemistry, bioorganic chemistry, high-throughput screening, combinatorial chemistry, compound diversity measurements, drug absorption, drug distribution, metabolism, new and emerging drug targets, natural products, and structure-activity relationships.

### Guest Editor

Dr. Dharmendra Kumar Yadav

College of Pharmacy, Gachon University of Medicine and Science,  
Incheon City 21924, Korea

### Deadline for manuscript submissions

closed (30 September 2021)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

---

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
