Natural and Synthetic Toxins: Molecular Aspects and Development Treatment Strategy II

Message from the Guest Editors

This Special Issue is the continuation of our previous Special Issue, entitled "[Natural and Synthetic Toxins: Molecular Aspects and Development Treatment Strategy](#)". This Special Issue will be focused on both synthetic and naturally occurring toxins, their chemistry, and their biochemistry. Their effects will be solved at the molecular level (molecular biology and computer modelling). Finally, their toxic potential and possible antidotes used in the case of intoxication will be discussed.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
