Novel Development and Therapy in Neovascular Retinal Diseases

Message from the Guest Editors

Neovascular retinal diseases, such as age-related macular degeneration (AMD), diabetic retinopathy (DR), and retinopathy of prematurity (ROP), are major causes of vision loss in both adult and pediatric populations. They have caused a heavy burden in the health care system globally. These pathologies could result in neuronal damage and poor vision of the patients. Recent advances in retinal imaging, telemedicine, surgical instrumentations, molecular sciences, target therapy, such as anti-vascular endothelial growth factor (VEGF) have revolutionized the way we take care of these patients with neurovascular retinal disease. The exploration of these new developments could result in better understanding of disease pathogenesis, and generation of novel management and new therapy for the patients. In this Special Issue, we target on all aspects of neovascular retinal diseases. Research articles, review articles, case series, as well as communications are welcomed.

Guest Editors

Dr. Wei-Chi Wu

Department of Ophthalmology, Chang Gung Memorial Hospital, Linkou Medical Center, Taoyuan 333, Taiwan

Dr. Jay Chhablani

UPMC Eye Center, University of Pittsburgh, Pittsburgh, PA 15213, USA

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
