Nephrotoxicity 2022

Message from the Guest Editor

Nephrotoxicity can be mediated through many different xenobiotics. The kidney is a target for toxicity by many structurally diverse chemicals, through poorly understood mechanisms. Additionally, very little is known regarding the impact of nephrotoxic substances on the cell-signaling pathways involved in cell death and repair. This Special Issue will focus on examining the mechanisms of nephrotoxicity as well as the potential of confounding factors to increase susceptibility to renal toxicity such as aging or the presence of diseases such as diabetes. This Special Issue will also examine potential biomarkers of nephrotoxicity. Additionally, articles in this Special Issue will address the impact of nephrotoxic substances on cell signaling and protein expression that influence cell function.

Guest Editor

Prof. Dr. Monica Valentovic

Department of Biomedical Sciences, Joan C. Edwards School of Medicine, Marshall University, Huntington, WV 25755, USA

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
