

Special Issue

New Plant Models

Message from the Guest Editor

The recent explosion of research activities that has encompassed a broad taxonomic array of organisms has yielded a new and exciting set of model organisms for future research. This, in turn, will allow for robust investigations that will significantly aid in our understanding of evolutionary relationships, provide convenient organismal systems for elucidating the foundational principles of life, and identify new organisms that will revolutionize applied biology in areas such as agriculture, industry, and medicine. It is the goal of this Special Issue to introduce some of these novel organisms, summarize their unique features, and highlight their future applications in all areas of biological research.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
