

## Special Issue

# Nuclear Lipid Signaling

### Message from the Guest Editors

In this Special Issue of *IJMS*, we would like to invite review and original articles that focus on nuclear structure, presence of lipids in nuclear domains, lipid mediated signaling in both normal and pathological conditions. Additionally, articles showing how phospholipids in general and polyphosphoinositide in particular and/or their metabolizing enzymes directly affects the transcriptional machinery are welcome. Given that a particular interest has been raised by the fact that inositol and inositol-related nuclear signaling (i.e., PKCs translocation into the nucleus) play a role during growth and differentiation of progenitor/stem cells, manuscripts dealing with nuclear lipid signaling in progenitor/stem cells are welcome as well.

---

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
