Special Issue

Early Life Nutrition and Cardiovascular Health and Development

Message from the Guest Editors

Suboptimal nutrition (under and over nutrition) in early life can have lifelong consequences on cardiovascular development and health. The aim of this Special Issue aims to characterize mechanisms by which early life nutrition influences cardiovascular health and development. A secondary aim is to highlight interventions that may restore cardiac health following a period of suboptimal nutrition in early life. Lastly, investigations that address tissues (lungs, blood vessels, kidneys, skeletal muscle, nervous system) that support the cardiovascular system will be considered in order to provide an integrative physiology perspective.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
