Advances in Molecular Understanding of Ocular Adnexal Tumors

Message from the Guest Editor

This Special Issue invites authors to submit comprehensive molecular biological work that aims to elucidate the molecular and epigenetic mechanisms operable in tumors of the ocular adnexa. As rare as these tumors may be, a better understanding of their molecular genetic bases and epigenetics is essential for improving the diagnosis and treatment of patients.

Keywords:

- molecular genetics
- epigenetics
- DNA methylation
- ocular adnexal tumor
- conjunctival melanoma
- ocular surface squamous neoplasia
- sebaceous carcinoma
- ocular adnexal lymphoma
- lacrimal gland tumor
- orbital tumors

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
