

Special Issue

Paediatric Formulation: Design and Development

Message from the Guest Editors

The aim of this Special Issue is to provide an update on both state-of-the-art methodology and operational challenges in paediatric formulation design and development. It aims at re-evaluating what is needed for more progress in the design and development of age-appropriate treatments for paediatric diseases. We welcome original research, review, opinion papers, editorials, or short communications on the following topics:

- paediatric formulation development;
- drug delivery design in paediatrics;
- orphan drugs;
- pharmacology and toxicology of drugs and excipients in paediatrics.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
