

Special Issue

Structural/Functional Characterization of Plant Proteins

Message from the Guest Editors

Disentangling the relationship between protein structure and function continues to be a priority not only in several fields of structural biology, including molecular biology, biochemistry, and protein engineering, but also in plant physiology and food sciences, including new industrial applications. Today, there is an increasing interest in plant proteins. Plants are able to accumulate—in specialized reserve tissues—huge amounts of proteins with unique and interesting structural features. This Special Issue aims to collect, from the broadest context, the current status about plant proteins and to contribute to their exploitation and valorization. Research papers and reviews that expand knowledge about the molecular determinants driving their structure–function relationships, including *in vivo* and *in vitro* interactions with other proteins and other macromolecules, as well as their potential for innovative applications in all fields, taking into account bioactivities implicated in human nutrition and health, are welcome.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
