

## Special Issue

# Bridging the Gap between the Clinical and Regulatory Use of Plasma Rich in Growth Factors. Where Are We?

### Message from the Guest Editors

Platelet-rich plasma (PRP) therapies have been attracting great attention in both the research and clinical community. However, the field faces important challenges at the basic, clinical, and regulatory frameworks. These three fields are progressing at a different pace, thereby generating a gap that in certain occasions is difficult to bridge effectively and efficiently. An evidence-based approach and appropriate regulatory framework would ensure both patient safety and the consolidation of current treatments and development of future applications. At the same time, quality studies are needed to promote the safe advancement of these types of biologic therapies. Manuscripts are welcome to be submitted to cover the topics of platelet-rich plasma therapies, including in vitro research, preclinical in vivo, clinical studies or regulatory issues regarding the use of PRPs. However, the topics of interest are not limited to these. This issue aims to put in the same space and time coordinated basic, translational, and clinical research together with a regulatory/ethical overview in an effort to approximate the needs and bridge the gap.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
