Molecular Determinants of Seminal Plasma on Sperm Biology and Fertility

Message from the Guest Editors

This issue of IJMS is focused on "*Molecular determinants of seminal plasma on sperm biology and fertility*," and therefore welcomes novel research or insightful reviews on seminal plasma components, either basic or applied. Since seminal plasma involves many levels of animal reproduction, submissions dealing with its production, regulation, or related pathologies are also welcomed.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
