Interplay between Pre-mRNA Splicing and Other Gene Expression Steps in Eukaryotes 2.0

Message from the Guest Editor

In eukaryotes, RNAs transcribed from genomic DNA are subjected to many regulatory processes, indicating their pivotal role in gene expression. Pre-mRNA splicing is a process to remove introns and ligate exons so that mRNA can be produced. This step is critical for higher eukaryotes and is vigorously regulated. After finding the Exon Junction Complex, several lines of evidence have noted that pre-mRNA splicing and other gene expression steps have influence over each other and there is an interplay between pre-mRNA splicing and other gene expression in higher eukaryotes. As the of this Special Issue, "Interplay between Pre-mRNA Splicing and Other Gene Expression Steps in Eukaryotes", in *IJMS*, I expect submissions from many researchers working on the wide spectrum of physiological processes in which RNAs are involved.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
