

## Special Issue

# Precision Medicine for Oral Diseases and Cancers

### Message from the Guest Editors

Precision medicine has emerged as a powerful model that focuses on how biomolecular factors can influence individual responses to different medications/therapies affecting drug efficacy, side effects and adverse events related to therapy. The study of the molecular and cellular mechanisms that regulate complex systems requires an intense interaction between basic and applied research. Translational medicine combines biomedical skills and advancements in basic research with clinical reality.

Suitable topics include, but are not limited to, the following: translational research, precision/personalized medicine stem cells, bioscaffolds, biomedical devices, health informatics, bioinformatics, biotechnology, biomechanics, computational mechanobiology, microbiota, and the role of oral health and disease on contributing to general health and systemic conditions. The main focus is on novel developments and applications in precision medicine and relevant themes. We especially encourage the submission of interdisciplinary work research and welcome submissions of original research papers using different study designs and critical and relevant reviews.

### Guest Editors

Prof. Dr. Marina Di Domenico

Department of Precision Medicine, University of Campania "Luigi Vanvitelli", 80138 Naples, Italy

Prof. Dr. Andrea Ballini

Department of Clinical and Experimental Medicine, University of Foggia, 71122 Foggia, Italy

### Deadline for manuscript submissions

closed (20 March 2025)

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
