

## Special Issue

# Pathogenesis of Pregnancy-Related Complications

### Message from the Guest Editor

Preeclampsia, HELLP syndrome, fetal growth restriction, gestational diabetes mellitus, preterm birth and invasive placenta are major complications responsible for maternal and perinatal morbidity and mortality.

Elucidation of the molecular mechanisms related to the initiation and onset of severe pregnancy-related complications enables the identification of potential biomarkers for early stratification of at-risk patients.

Additionally, pregnancy-related complications induce long-term metabolic and vascular abnormalities that might increase the overall risk of metabolic, cardiovascular, cerebrovascular, kidney, and other diseases later in life in mothers and their offspring. This Special Issue aims to provide an overview of the latest research on the molecular and cellular mechanisms associated with pregnancy-related complications, as well as the contribution of pregnancy-related complications to the later development of various diseases. This will include underlying mechanisms, diagnostics/prognostics and treatment strategies associated with pregnancy-related complications, and will be of interest to scientists and clinicians working in this fastly expanding area.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
