Protein Biosynthesis and Drug Design & Delivery Processes

Message from the Guest Editor

From the initial, epoch-making work of Bruce Merrifield and solid-phase peptide synthesis, the era of protein biosynthesis, along with drug-delivery and processes, has come a long way. Having mastered methods to introduce unnatural amino acids, and moieties of interest into protein chains, we are now firmly in the era of biologicals. Matching these efforts and surpassing them will enable us to make inroads into drug-design and delivery processes. While *in silico* computational approaches remain the mainstay of the drug development pipeline, novel delivery systems embrace nanotechnology to enhance delivery efficacy and specificity. In this Special Issue, we cover advances in protein biosynthesis, drug-design, and delivery processes and remark on the future of these arenas.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
