

## Special Issue

# Protein Domain Evolution and Involvement in Diseases

### Message from the Guest Editors

Protein domains are structural and functional units harboring specific functions and orchestrating various processes, from enzyme catalysis to signal transduction. The use of protein domains in different contexts, a phenomenon called versatility or promiscuity, permits the molecular tinkering necessary for functional diversification and species evolution. Protein domains are evolutionarily conserved and several domain databases have been developed, providing statistical models allowing automatic protein annotation and experimental 3D structures enabling homology modeling and comparative analyses. These different levels of information (sequence, structure and evolution) available for protein domains can be used to understand the molecular mechanisms of human diseases, providing tools for diagnosis and specific therapeutic approaches. However, challenges remain, particularly for improving the sequence annotation of the dark proteome. This Special Issue will cover a selection of recent research topics in the field of protein domain discovery, annotation and evolution, with a relationship to human diseases. Research papers, up-to-date review articles, and commentaries are welcome.

### Guest Editors

Prof. Dr. Isabelle Callebaut  
IMPMC, CNRS-Sorbonne Université, Paris, France

Dr. Tristan Bitard-Feildel  
Laboratoire de Biologie Computationnelle et Quantitative (LCQB),  
CNRS-Sorbonne Université, Paris, France

### Deadline for manuscript submissions

closed (31 December 2019)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
