

## Special Issue

# Research of Mitochondrial Function, Structure, Dynamics and Intracellular Organization

### Message from the Guest Editor

Mitochondria play a central role in maintaining cellular function by energy (ATP) production. They are also a source of reactive oxygen species and pro-apoptotic elements. In addition to oxidative phosphorylation (OXPHOS), mitochondria regulate a wide range of metabolic processes and cellular signaling mechanisms. The importance of mitochondria in many aspects of cell physiology, bioenergetics, normal cell function and ions control (in particular  $\text{Ca}^{2+}$ ) is well known. Changes in mitochondrial function and energy transfer play crucial role in numerous diseases and in aging. Therefore, multifaceted and comprehensive analysis of mitochondria is central in the studies of energy metabolism and in pathophysiology of human diseases, including ischemia-reperfusion injury, myopathies, neurodegenerative diseases and cancer. The study of mitochondrial oxygen consumption (OXPHOS) can be performed using isolated mitochondria or in situ, in permeabilized cells or muscle fibers. Moreover, changes in the mitochondrial structure, dynamics, organization and function can be analysed by fluorescent imaging approach.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
