Sperm and Seminal Plasma: A Molecular Genetics Perspective

Message from the Guest Editor

Male fertility remains a subject of intensive research. Novel technologies are currently available to increase knowledge of semen quality having a critical role in male fertility. Numerous intrinsic and extrinsic factors to the animal affect semen quality, leading to jeopardized fertility outcomes of the male. The study of male fertility remains unsatisfactory. Investigations of semen, focusing on spermatozoa and seminal plasma, show great promise in terms of delivering comprehensive information on male fertility. The current Special Issue seeks contributions utilizing modern technologies to decipher the molecular genetics of and advance the status of knowledge of sperm biology and fertility potential.

Guest Editor

Dr. Jean Feugang

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
