Advances in Single Molecule Spectroscopy

Message from the Guest Editor

Since the first reports of single-molecule spectroscopy in the mid 1980s, single-molecule techniques have greatly expanded to include the study of photophysics and photochemistry of individual molecules, biomolecules, living cells, and nanomaterials. The powerful application of absorption, fluorescence, and Raman spectroscopy to individual chromophores, be they molecules, proteins, or nanoparticles, has provided tremendous insight into the structure and dynamics of heterogeneous systems. Applications of single-chromophore spectroscopy include imaging and microfluidics as well as studies of energy and charge transfer.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
