## Solution Chemical Kinetics 2.0

### Message from the Guest Editor

In solutions, there are enormous numbers of solvent molecules that are in constant kinetic interaction with other solute reactants and amongst themselves. The quantitative study of these coupled collisions as a function of time, the stoichiometry of such chemical encounters, and any resultant changes in energy or in covalent and noncovalent chemical structures is relevant, complex, and interesting to chemical, biological, and environmental systems. This *IJMS* Special Issue is dedicated to papers that examine the significance and enhance our basic understanding of chemical reaction kinetics, molecular reaction dynamics, and reaction mechanisms that occur in solutions.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
