

## Special Issue

# Supramolecular Functional Materials

### Message from the Guest Editor

The aim of this Special Issue is to collect molecular materials based on self-assembly approach. Furthermore, ultimate goal of the supramolecular chemists is to constructing macromolecular and supramolecular molecular nano-objects architectures with precise arrangement of multiple chromophores into functional nanosized structure utilising small organic molecules via bottom-up approach for advancing optoelectronic devices, sensors, catalysis, etc. We invite contributions of reviews and/or original papers reporting recent efforts in the field Supramolecular Functional Materials to this special issue.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
